Who gave the name India to the country?

The name India is derived from the river 'Sindhu' or India as called by the ancient Greeks. S from Bharat became I in the west, hence 'Ias' became India. And the land of India was called Indica or India.
Hinduism does not have a single holy book that guides religious practice.

The Indus Valley Civilization, also known as the Harappan Civilization, was an ancient civilization that existed in the Indus Valley region of South Asia, primarily in what is now Pakistan and western India. The civilization flourished between approximately 2600 BCE and 1900 BCE, although its decline and ultimate collapse remain a subject of debate among historians and archaeologists.

The Indus Valley Civilization is known for its sophisticated urban planning, including the construction of well-planned cities with advanced sewage and drainage systems, as well as for its impressive craftsmanship in areas such as pottery, metallurgy, and jewelry-making. The civilization also had a complex social and economic system, with evidence of trade networks extending as far as Mesopotamia and other parts of the ancient world.

The Harappan script, which was used by the civilization for record-keeping and communication, remains undeciphered, which has limited our understanding of the civilization's literature and historical records. Despite this, archaeological excavations of Harappan sites have provided important insights into the lives and culture of this ancient civilization.

The Harappan Civilization, also known as the Indus Valley Civilization, existed during the Bronze Age, roughly between 3300 BCE and 1300 BCE. It was one of the world's earliest urban civilizations, with major settlements in what is now Pakistan and northwest India. The civilization is named after Harappa, one of its prominent archaeological sites. The exact timeline of the Harappan Civilization may vary slightly

Hindus rulers

After the decline of the Harappan Civilization, India saw the rise and fall of many different empires and kingdoms, some of which were Hindu in character, while others followed different religions. Here are some examples of Hindu rulers in India after the Harappan Civilization:

Mauryan Empire (321-185 BCE): The Mauryan Empire was founded by Chandragupta Maurya, who unified much of the Indian subcontinent under his rule. His grandson, Emperor Ashoka, converted to Buddhism during his reign, but the Mauryan Empire remained largely Hindu in character.
Gupta Empire (320-550 CE): The Gupta Empire was a major Hindu dynasty that ruled over much of northern India. The Guptas are known for their patronage of the arts and sciences, and their period is sometimes referred to as a 'golden age' of Hindu culture.
Chalukya Dynasty (543-753 CE): The Chalukya Dynasty was a Hindu dynasty that ruled over parts of southern and central India, known for their patronage of literature, art, and architecture.
Rashtrakuta Dynasty (753-982 CE): The Rashtrakutas were a powerful Hindu dynasty that ruled over parts of western, central, and southern India, known for their military prowess and cultural achievements.
Chola Dynasty (300s BCE-1279 CE): The Cholas were a Hindu dynasty that ruled over parts of southern India and Sri Lanka, known for their maritime trade and cultural achievements.
Vijayanagara Empire (1336-1646 CE): The Vijayanagara Empire was a powerful Hindu empire that ruled over much of southern India, known for its patronage of art, architecture, and literature.

Note that this is not an exhaustive list, and there were many other Hindu kingdoms and empires that ruled over different parts of India after the decline of the Harappan Civilization. There were also other religious traditions that coexisted alongside Hinduism, including Buddhism, Jainism, and later, Islam.

The number of Indus rulers is not known as the Indus Valley Civilization, also known as the Harappan Civilization, did not have a centralized political system or a system of monarchy. The civilization was composed of many cities and towns, each with its own governing structure.

In contrast, there were a total of 16 Muslim dynasties that ruled over various parts of the Indian subcontinent between the 12th and 19th centuries CE. These dynasties were:

Ghurid dynasty (1192-1206)
Mamluk dynasty (1206-1290)
Khilji dynasty (1290-1320)
Tughlaq dynasty (1320-1413)
Sayyid dynasty (1414-1451)
Lodi dynasty (1451-1526)
Bahmani Sultanate (1347-1527)
Vijayanagara Empire (1336-1646)
Gujarat Sultanate (1407-1573)
Bengal Sultanate (1352-1578)
Deccan Sultanates (1490-1596)
Mughal Empire (1526-1857)

Qutb Shahi dynasty (1512-1687)
Nizam Shahi dynasty (1490-1636)
Asaf Jahi dynasty (1724-1948)

Note that the above list includes both dynasties and sultanates, and some of these ruled over different parts of India at different times.

In Hinduism, there are several types of marriages.

According to the ancient Indian texts like Manusmriti, Mahabharata and Vedas, there are eight types of marriages (Vivah) in Hinduism1:

Brahma marriage: In this type of marriage, the father of the bride chooses a man learned in the Vedas and conducts a ceremony to give his daughter away2.
Daiva marriage: In this type of marriage, the daughter is groomed with ornaments and "offered" to a priest who duly conducts the marriage ceremony2.
Asura marriage: In this type of marriage, the groom gives a cow and a bull to the father of the bride as a gift2.
Prajapatya marriage: In this type of marriage, the bride's father gives his daughter to a man who has self-control and is well-behaved2.
Asura marriage: In this type of marriage, the groom gives wealth to the bride's father and takes her away2.
Gandharva marriage: In this type of marriage, the bride and groom fall in love and get married without any rituals or ceremonies3.
Rakshasa marriage: In this type of marriage, the groom abducts the bride against her will and marries her2.
Paisacha marriage: In this type of marriage, the groom seduces an unwilling woman and marries her3.

I hope this helps! Is there anything else you would like to know?

Niyog Prarthna - Niyog Prarthna was a practice prevalent in ancient India, primarily amongst Hindus, where a childless widow or wife whose husband was incapable of fathering children could procreate with another man. The main purpose of this practice was to ensure lineage continuation and fulfill the desire for offspring.

Meaning:

Niyog translates to "appointment" or "arrangement" in Sanskrit.
The practice aimed to fulfill the woman's wish for motherhood and preserve her deceased husband's lineage.

Sources:

While the practice predates written records, references to Niyog Prarthna can be found in various ancient texts:

Dharmashastras: These are legal and social codes, with Manusmriti being the most well-known. Manusmriti mentions Niyog Prarthna in specific contexts, like when a woman has no children after eight years of marriage or if her husband is impotent.

Smriti texts: These are additional texts that elaborate on Hindu laws and customs. Yajnavalkya Smriti and Narada Smriti also discuss Niyog Prarthna, outlining conditions and regulations for its practice.
Puranas: These are mythological epics like Mahabharata and Ramayana, where instances of Niyog Prarthna are depicted in specific scenarios.

Important Points:

Niyog Pratha was not considered adultery, as the woman's consent and specific guidelines were required.

The chosen man (usually the deceased husband's brother or another related male) was called the Niyoga Putra or Kahetrāja.

The offspring born through Niyog Pratha held inheritance and lineage rights like any other child.

The practice declined over time and is considered obsolete in modern India. It is widely criticized for its patriarchal nature and potential for exploitation.

Remember:

Niyog Pratha was a complex and controversial practice with varying interpretations and contexts in ancient texts.

It is important to approach this topic with historical and critical understanding, recognizing its social and ethical implications.

I hope this information provides a comprehensive overview of Niyog Pratha. If you have further questions or require specific details from any of the mentioned sources, feel free to ask.:

2. Relationship and Proximity

Ideally, the man chosen for Niyog Pratha would be a close relative of the woman's husband. This could include the husband's brother, cousin, or uncle. The preferred order often depended on age and suitability.

Choosing someone outside the family was discouraged and required stricter justifications. In rare cases, if no suitable relative was available, a respected sage or learned member of the community might be chosen.

He is the golden embryo. Do not harm me. He is this.

He who holds all this universe, who is its king, who pervades and rules over all worlds—is not he Indra?" (While not specifically stating formlessness, this verse emphasizes the vastness and majesty of the divine, hinting at its beyond-form nature.)

Sama Veda:

1.54.8: "He is within and without, moving and yet unmoving. He is far and yet near. He is the same within all beings."

Arya Samaj -

Who founded Arya Samaj and why?

Arya Samaj was founded by Swami Dayanand Saraswati in 1875. The organisation voiced for causes like widow remarriage and education of girl children.

The metrical text is in Sanskrit, is dated to the 1st to 3rd century CE, and presents itself as a discourse given by Manu (Śvayambhuva) and Bhṛgu on dharma topics such as duties, rights, laws, conduct, virtues and others. The text's influence had historically spread outside India.

Structure:

The Manusmṛiti has a complex structure, not directly comparable to the Vedas or Upanishads. It has 12 Adhyayas (chapters) further divided into smaller sections containing verses in varying numbers.

Examples:

Adhyaya 2: 149 verses divided into several subsections discussing duties of students, householder, etc.

Adhyaya 4: 269 verses divided into subsections discussing women, marriage, inheritance, etc.

Number of Verses:

Total: 2,694 verses spread across 12 chapters.

Founder/Author:

The authorship of the Manusmṛiti is uncertain and disputed. Traditionally attributed to Manu, a mythical figure, evidence suggests its composition by multiple authors over centuries.

Why was it written?

The Manusmṛiti aimed to offer a prescriptive code of conduct covering various aspects of social life, religious rituals, and legal matters. However, its interpretations and applications through history have been contentious due to potential biases and discriminatory views.

Time

Uncertain authorship: Traditionally attributed to Manu, a mythical figure, the text likely had multiple contributors over centuries. This makes pinpointing a specific creation date difficult.

Varying recensions: Different versions and interpretations of the Manusmṛiti exist, potentially containing additions or omissions across them.

Historical context: Evidence suggests parts of the text may have originated as early as the 1st-7th centuries BCE, while other sections were likely added as late as the 2nd century BCE.
